

## How to Correct Your GICCA Calendar Link in Google

In December 2020 most GICCA activities/events on the myquemes.org website calendar were SUSPENDED due to COVID. At that time, GICCA switched to a new calendar named ***Island Happenings***, which originally listed a few COVID-friendly events that could keep islanders “socially connected” in the outdoors or in the safety of their own home. Once COVID cases declined and it was safe to gather again, more activities and events were added to the ***Island Happenings*** calendar. This calendar has now become the default calendar on the myquemes.org website. If you have previously linked the old GICCA calendar (showing the SUSPENDED activities) to your personal Google Calendar page, you will need to make the following change.

In order to view the current and correct GICCA calendar on your personal Google Calendar page, you must add the correct link.

Go to the [myquemes.org](https://myquemes.org) website. Click on the blue ***Island Happenings*** button on the homepage to open the calendar. Scroll down to view the box in the lower right corner that reads [+][GoogleCalendar](#). Click on the box and it will take you to the Google Calendar page in your personal Google account. On the left is a list titled *Other Calendars*. ***Island Happenings*** should now appear in the list. Check the box next to this calendar. Uncheck the box next to the old GICCA calendar with the SUSPENDED activities.

It's much easier than it sounds!
